

Amendments to the Abstract:

ABSTRACT

~~According to the present invention, a~~ A first video receiver is controlled to
~~interrupts interrupt~~ live watching and ~~listening to of~~ a television broadcast program.
~~Thereafter, and thereafter,~~ a second video receiver installed in another ~~place~~ location
can ~~be controlled to~~ continue watching and ~~listening to~~ display of the program from
the interrupted point ~~of the live watching and listening in the program~~.

———There is ~~provided~~ a digital video recorder server that is capable of
communication between local and ~~remote~~ remote sets via a home network. When a
move watching and listening function is ~~manipulated on~~ commanded at the local set,
a built-in digital video recorder ~~part~~ starts recording a the program in ~~the process of~~
~~live watching and listening so far progress~~. When ~~receiving a command is received~~
at the local set for shift shifting the watching and listening from of the program to the
remote set thereafter, the local set reads the recorded program from the recording
start point and delivers it to the remote set from a the server ~~part~~ for effecting time
shift watching and listening to the program on the remote set.
